📁 PROJECT

Cloud-based Hospital management system
Implemented a scalable Hospital Management System in the cloud using kubernetes.

- Implemented using the MERN stack (MongoDB, Express, React, Node.js).
- Deployed on Google Cloud Platform leveraging Kubernetes for container orchestration, ensuring high availability, fault tolerance, and seamless scalability.
- Aimed at streamlining appointment scheduling, Patient record management, Doctor & departments & staff management, Medical records and billing, enhancing overall healthcare service delivery.
